

DEFCON 5

16 0 1

Chapter 1 by Adrian Hutabarat

The UN defence armada and armies was blockading the Diomed islands. A large Russian fleet hijacked by terrorists was amassing. The Diomed islands hid a project the UN did not want the world to know about. **Codes.**

Elsewhere, team 1-8-6 was on a cargo plane above Burma. Heading towards Moscow after their defence in Singapore. The combined triangulated, naval might of the UN left many seas undefended against pirates. So, the plane was advised to travel along a land route. There has been a report of military grade transport ship dropping off a van in a remote region.

Team 9-7-3 was tasked with investigating another reported a driving towards Washington. Both teams stopped their corresponding van, but it was too late. Inside were specially trained hackers with communications disc capable of activating ICBM's. The two teams purged the hackers, but the codes were already set in. Thousands of missiles launched heading straight to the UN defence fleet. The ICBM's were heading into space.
